Continuation of 11. does NOT place the application in condition for allowance because: Applicant's response has been overcome the objection to the specification and 35 USC 101 rejection to the claims. However, Applicant's arguments filed October 17, 2008 have been fully considerer but they are not persuasive. The examiner respectfully traverses applicants' argument.

Claim Rejection - 35 USC § 102 (e)

Regarding claim 1, applicant's argument on page 6 stated, "Slaughter does not describe using session announcements busing Session Announcement Protocol (SAP) or Session Description Protocol (SAP) as identified in the present application (see, for example, page 20, lines 22-33). In fact, Slaughter does not describe any form of a session which is transmitted through a network such as, for example, an IP stream transmitted at a given time." On the contrary Examiner pointing out that "Session Announcement Protocol (SAP)" is not included in claim 11 but it is described in claim 17, which is rejected by the 35 USC § 103 (a) rejection. In fact, Reynoids teaches, "Transport type B include three related data sources announcements (which can be delivered via the session announcement protocol (SAP)", which clearly describes about the function of the session announcement protocol. Nevertheless, about "a session which is transmitted through a network", Slaughter teaches, "distributed computing environment may use the Multicat Announcement Protocol (multicast UDP) to announce themselves on a LAN" at col. 41 and lines 19-23, thus, the announcement contains the description of the one or more sessions which is beint transmitted through a network."

Claim Rejection - 35 USC § 103 (a)

Claims 17, 18 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Slaughter et al. (U.S. Application Patent No. 7,080,078 B1) in view of Reynolds et al. (U.S. Publication No. 2001/0037500).

In light of the foregoing arguments the 35 U.S.C. § 102 (e) and 35 U.S.C. § 103 (a) rejections are hereby sustained.
